

AURALIS NATURA · HOLISTIC HEALTH

Client Portal, Ops Console & Cloud Report Agent

The system behind the practice: a private client login and premium health intake, Desiree's back-office console, and an AI agent that drafts the premium report — which she reviews, approves, and sends in one click.

Concept overview · adapts the proven Paramur system · June 2026

The idea in one line

A client logs in, fills a beautiful health intake; Desiree reviews it, adds her call notes, and clicks one button; a cloud agent drafts a super-premium, science-led report; she edits and approves it; a second click renders the PDF and drops a ready email — with a booking link for the review call — into her Gmail drafts to send.

The golden rule. The agent only ever produces a *draft*. Nothing reaches a client until Desiree has reviewed, edited and clicked *Generate*. This is coaching & education — never medical diagnosis — and the human-approval gate is wired into the process.

The four surfaces

1 • PUBLIC

Homepage

auralisnatura.com (already live). We add a discreet **Client Login** entry.

2 • CLIENT

Client-Portal

Login → the **premium intake form** (history, symptoms, goals, consent, red-flag). Later: view the report + book the review call.

3 • FOUNDER

Betriebskonsole

Desiree's cockpit: review intake, add call notes, run the agent, **review & approve**, generate + draft-email the report.

4 • BACKGROUND

Cloud Report Agent

Claude drafts the six-part, benchmarked, visual report from intake + notes and talks to the console. Draft only — never emails a client.

The client journey

1	Discover — books the free 25-min call on the site. AUTO
2	Login & intake — logs into the portal, fills the premium health form (consent + red-flag). AUTO
3	Prep — the agent writes a short meeting-prep summary so Desiree walks in prepared. AUTO
4	Discovery call — Desiree adds her notes in the console. MANUAL
5	Draft — one click → the Cloud Agent writes the premium report content. AUTO
6	Review & approve — she edits every section in the console. ★ APPROVE
7	Generate — one click → premium PDF rendered, saved, and dropped as a Gmail draft (report + review-call link). AUTO
8	Send — she sends the draft from Gmail. ONE CLICK
9	Review call — the client opens the report, books the review call, they discuss it. MANUAL

Two manual conversations, one approval gate — the rest runs itself.

How the report gets made

Intake + call notes → Cloud Agent → your review → premium PDF

The console sends the agent only what it needs (minimised intake + your notes). The agent returns a structured six-part draft — **Your starting point · What we're seeing · The science, simply · Your plan · When to see a doctor · Your next steps** — benchmarked against the best holistic reports, with charts built from the client's own energy/sleep/stress numbers. You edit it, approve it, and the renderer turns it into a visually rich, on-brand PDF.

The stack (reuses the proven Paramur engine)

LAYER	WHAT	ACTION
Engine	Flask app · portal/console auth · Gmail-draft mailer · self-updating Mac/Windows launchers · backup + failover · Cloudflare tunnel + Pages	reuse
Config + brand	company.json · config.json · clients.json · report_engine.json · the Auralis seal & warm-earth palette	swap

LAYER	WHAT	ACTION
Auralis-specific	the premium health intake · the Cloud Report Agent + visual report renderer · the client-journey stages	build

Hosting, domain & safety

Site → Cloudflare Pages (dev/prod previews; replaces GitHub Pages). **Portal + console + agent** → a local Flask app on Desiree's Mac (→ Windows later), reachable only through a **Cloudflare named tunnel** at `api.auralisnatura.com` — the app never opens a public port. The console sits behind **Cloudflare Access** (email code). **Recommendation:** move the domain from Squarespace (expensive) to **Cloudflare Registrar** (wholesale price + one control plane + the security tunnel).

Health data, handled properly. The intake is special-category data under GDPR. The design is EU-resident end-to-end, encrypted at rest, consent-first, minimised, with retention + one-click export/erase and DPAs with every processor. Details in the Security & GDPR guide.

Auralis Natura — holistic health & nutrition coaching (education, not medical care). It does not diagnose, treat or replace a doctor. “Dr.” = Dr. rer. nat. (academic doctorate in chemistry), not a physician. In an emergency call your local emergency services (Spain: 112). Special-category health data is processed under the EU GDPR. · Dr. rer. nat.
